

EMANI K. ATKINS

Ellicott City, MD | 443.381.4002 | emanikierra@gmail.com

Data analyst and AI/ML practitioner with a Cybersecurity M.S. and a GIS/spatial-analytics background, spanning production computer vision development, secure data pipelines, and enterprise systems administration. Built and refined computer vision models on a product team, then was retained through a team reorganization as a business analyst functioning in an internal capacity. Comfortable moving between writing and validating ML pipelines, hardening data systems, and advising leadership on responsible technology adoption.

PROFESSIONAL EXPERIENCE

KCI Technologies, Inc. - Sparks, MD

September 2026 – Present

Business Analyst - AI Governance Consultant

Retained in a consulting capacity after the product team's reorganization; selected to represent data science and security perspectives on the company's newly formed AI Governance Advisory Committee, leveraging Cybersecurity M.S. and hands-on model-development experience to help set enterprise AI policy.

- Serve on a cross-functional AI Governance Advisory Committee tasked with developing frameworks, policy, and risk-review processes for the organization's expanding use of AI – one of 6 employees selected company-wide.
- Draft governance documentation and risk/compliance guidelines covering AI model use, addressing data security, access control, and responsible-use standards, drawing directly on M.S. Cybersecurity Technology coursework.
- Advise business and technical stakeholders on AI adoption risk, translating hands-on production ML experience into practical policy recommendations for planned AI initiatives.
- Serve as a bridge between the technical team's prior model-development work and the business functions evaluating new AI and proprietary use cases.

KCI Technologies, Inc. - Sparks, MD

May 2022 – August 2026

Data Analyst - Computer Vision & ML Engineering

Member of a product team building AI-powered computer vision models for infrastructure and safety inspection use cases, from data pipeline through production deployment.

- Developed and deployed computer vision models using Python and machine-learning frameworks.
- Processed and labeled tens of thousands of images to build and refine 3 training datasets, improving model mAP scores from 23% to 65% and reducing false-positive rate by 20%.
- Built and maintained Python-based data preprocessing and ETL pipelines with validation and access controls, reducing manual data-processing time by 30%.
- Supported production troubleshooting by evaluating model and pipeline performance, investigating regressions, and documenting root-cause findings.
- Collaborated with cross-functional engineering teams to integrate REST APIs and cloud services, applying SSL/TLS and role-based access practices to support secure deployments.
- Managed Linux-based development and Docker container environments for model training and deployment; used Azure DevOps Boards to support Agile sprint planning and maintain SOPs/technical documentation across 14 sprints.

Dycom Industries, Inc. - Palm Beach Gardens, FL**Nov 2021 – May 2022***GIS Developer*

- Troubleshoot GIS applications, scripts, tools, procedures, and PostgreSQL-based systems.
- Developed and supported ETL/data-conversion workflows for custom software applications while preserving data integrity, access controls, and repeatable processing.
- Maintained user manuals, operational guidelines, configuration documentation, and implementation procedures to support secure software deployments.

Carroll County Government - Westminster, MD**Sep 2018 – Nov 2021***Enterprise GIS Analyst, Technology Services*

- Configured and supported cloud-based enterprise software and SaaS services using ArcGIS Online for 26 internal and public users, applying secure configuration and access-management practices.
- Administered users, domains, and roles across SQL Server databases to support data governance and access control for 5 databases.
- Monitored and maintained Python scripts automating SQL Server backups, supporting production and test server reliability with 100% uptime.
- Documented the location and workflow of all database maintenance, scripts, and web applications.

Maryland Environmental Service / Aerotek - Millersville, MD**Jun 2018 – Sep 2018***GIS Specialist (Contractual)*

- Performed technical and field work including stormwater management review and BMP inspections.
- Georeferenced BMP plans to imagery in ArcMap and assisted with spatial analysis.
- Managed data entry and data management for BMP projects using Survey123.
- Created, maintained, and enhanced digital field data collection forms.

U.S. Census Bureau / ASRC Federal - Suitland, MD**Apr 2017 – Jun 2018***GIS Technician (Contractual)*

- Evaluated and quality-checked centerline, hydrography, and attribute data using custom map-production tools.
- Used ETL software to convert hundreds of GIS database formats to CSV files and geodatabases, supporting downstream analysis.
- Reshaped road layers on hydro layers and edited highlighted boundaries and shapefiles.

EDUCATION**M.S. Cybersecurity Technology** - University of Maryland Global Campus

Jun 2022

B.A. Environmental Studies - University of Maryland Baltimore County

Dec 2016

SKILLS**AI / Machine Learning:** Computer Vision | Model Development & Refinement | AI Governance & Policy | Machine Learning | Predictive Analytics | Statistical Analysis**Cloud, Infrastructure & Operations:** Microsoft Azure | Cloud-Based Application Deployment | Infrastructure Monitoring | Observability Fundamentals | Root Cause Analysis | Linux | Windows Systems | Docker**DevOps, Automation & Development:** Python | Bash | Git | GitHub | Azure DevOps | Jira**Networking:** Networking Fundamentals | Network Infrastructure | Network Security**Cybersecurity & Incident Response:** Incident Response | Vulnerability Assessment | Risk Management | Nmap | Wireshark | EnCase | FTK Imager | CTF Challenges**Data, Databases & Analytics:** SQL | PostgreSQL | SQL Server (RDBMS) | DBEaver | ETL & Data Conversion | Data Analysis | Power BI | Database Management**Business Analytics:** Requirements Analysis | Technical Documentation | Executive Reporting
